Enterprise security

Pronto Xi's best-practice application security standards help keep your organisation safe

Security standards

Regular security penetration testing ensures your organisation remains protected against new and evolving security threats. Pronto Xi strictly adheres to security standards and industry best practices to help safeguard your organisation's security.

An example? Communications use digital certificates and highly secure protocols such as HTTPS and WSS (WebSockets over SSL/TLS).

Application security

Pronto Xi's administration tools enable you to control user permissions by using roles and security profiles — give scope permissions to individual companies, modules, screens or functions. With screen customisation, you can even control the individual fields a user sees.

In addition, data masking can be used to limit the data a user can access, such as restricting access to individual locations, territories, branches, asset groups and more.

These application security capabilities can also help you achieve segregation of duties (SoD).

Infrastructure security

We highly recommend using digital certificates and reverse proxy servers to maximise the security of your infrastructure. Pronto Software and our partners have extensive expertise in deploying infrastructure that puts the security of your business at the forefront.

Multi-factor authentication

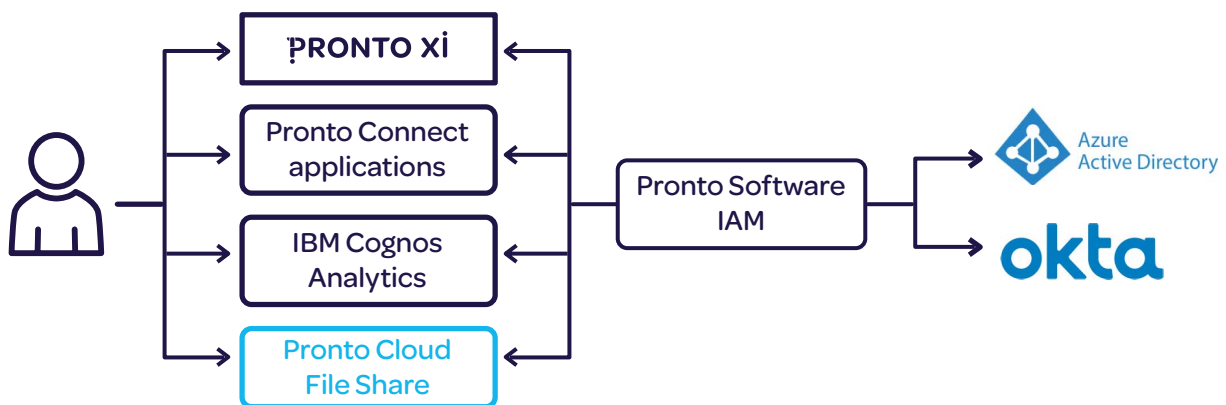

Pronto Software Identity and Access Management (IAM) enhances Pronto Xi's enterprise security by providing a single, consistent multi-factor authentication solution for a number of Pronto Xi applications.

Single sign-on

Users login to Pronto Xi and then access related applications without needing to login again, making the login process frictionless yet highly secure.

Supported applications

Identity and Access Management is supported on the web interface, Employee Portal, Mobile Service, Resource Scheduler, IBM™ Cognos™ Analytics*, and Pronto Cloud File Share.

Overview of how Pronto Software Identity and Access Management works

*IBM and Cognos are trade marks of International Business Machines Corporation, and are registered in many jurisdictions

About us

PRONTO

SOFTWARE

We are an Australian developer of award winning business management and analytics solutions. Pronto Xi, our Enterprise Resource Planning (ERP) software, integrates accounting, operational and mobile features in a single system – optimising business processes and unlocking actionable insights. That's why for more than 45 years, over 1,500 Australian and global organisations, across a wide range of industries, have trusted Pronto Xi to simplify their most complex challenges.

With headquarters and our Development Centre located in Melbourne, we have support offices and consultants based across Australia, as well as a global network of Resellers and Solution Partners. Specialised business units within Pronto Software have the expertise to assist you with pivotal technology – Digital Transformation with Pronto Woven, Cloud and Hosting services with Pronto Cloud and Business Intelligence solutions with Pronto iQ.

When you choose Pronto Software, you gain a team with deep industry experience, giving us the ability to understand your specific needs and build innovative solutions that drive business growth and revenue.
