Pronto Xi Proof of Delivery App

Maintain digital records of goods delivered to your premises, franchises and customers with the Pronto Xi Proof of Delivery App

The Pronto Xi Proof of Delivery App is a real-time window into your deliveries, and a vital step in organising, processing and recording deliveries.

Loading of goods

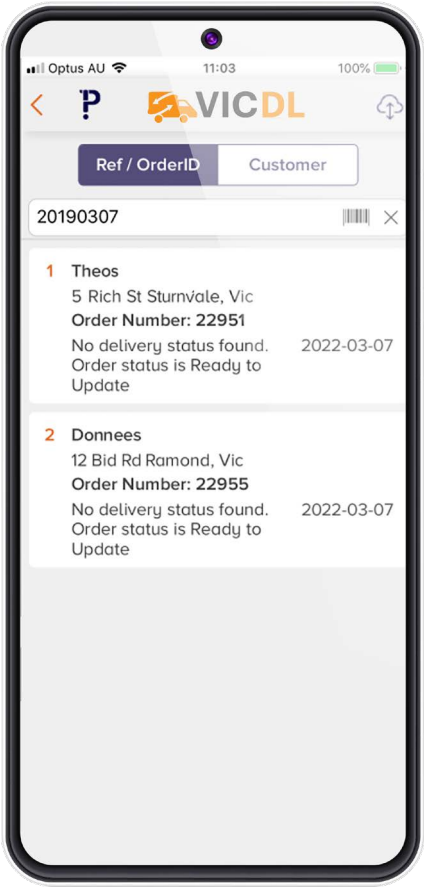
The Pronto Xi Proof of Delivery App includes the manifest information for a load, keeping administrative staff informed of a load's progress.

The app captures all package details, including its contents, allowing your staff to double-check every order loaded into delivery vehicles. If a load fails for any reason, you can record the failure and its cause, so that back-office staff can action it accordingly.

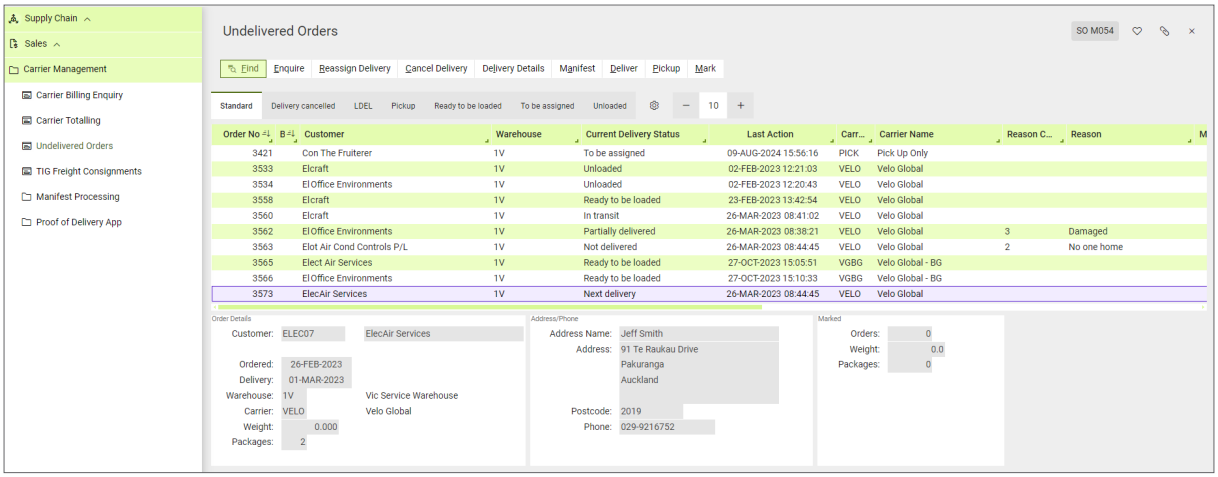
Pick-up of goods

The Proof of Delivery App supports the pick-up of goods from your warehouse.

Easily identify goods ready for pick-up using an assigned sales order number or customer number.



View orders and package details in the app



A view of the delivery work bench

Delivery information

The app allows you to view all deliveries or pick-ups by the nearest destination to your current location.

Advise drivers of your estimated arrival time based on distance and real-time traffic details from the app's integrated Google Maps functionality. At the same time, your operations staff remain updated on the delivery status of all packages.

Consolidate orders and instructions for delivery to the same customer and address. Save proof of delivery information once and the POD app will distribute the information to individual orders.

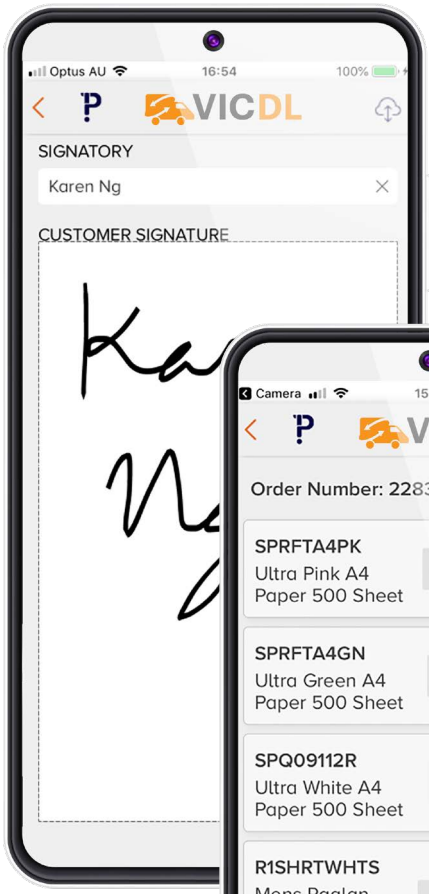
Customers sign for confirmation at the point of pick-up or delivery, or you can take an image as proof of delivery or pick-up. Record reasons for failed or partial deliveries, and update the status accordingly to keep the customer informed.

Offline capability

The Proof of Delivery App works offline, meaning you can stay connected if the cellular network drops out while on the road.

App administration

Keep your delivery data secure by registering or removing mobile devices' information in the Pronto Xi back end. Reset passwords, register carriers, track API calls and more — all from a single administration area within Pronto Xi.



Capture signatures to record proof of delivery
