Radio Frequency

Transform your warehouse into
a paperless environment with
Radio Frequency

By replacing paper-based processes, Radio Frequency lowers administration costs, eliminates errors in standard activities such as picking, and streamlines the information flow within your system.

Radio Frequency allows you to electronically transmit orders from Sales to your operators' handheld or vehicle-mounted terminals. It also includes options to automate a range of business processes.

When used in conjunction with the Warehouse Management System (WMS) or Scanpack, the full range of Radio Frequency's features include:

- incoming goods, including purchase order receipts, work orders and stock transfers
- stocktaking
- putaway
- replenishment
- inventory transfers for inter- and intra-warehouse
- store allocations
- picking
- packing
- order dispatch
- stock and location enquiries

Picking processes

A picker can pick from a pool — the holding area for released orders waiting to be picked — or from an assigned list.

Create multiple picking and packing pools and rank by priority. If the top-priority pool is empty, Radio Frequency automatically scans the next pool in the range. Intelligent pick-path information guides the picker around the warehouse.

When managing multiple warehouses, Radio Frequency users can alternate between warehouses to process tasks such as putaway, replenishments and transfers.

Integration and flexibility

Tailor Radio Frequency to support your specific business needs by integrating it with other Pronto Xi modules such as Inventory, Scanpack and WMS.

Radio Frequency’s fully configurable menus facilitate tasks ranging from stocktaking to processes using more advanced automation processes like picking, putaway and replenishment.

For example, in a large warehouse operation, dedicate some staff to putaway and replenishment tasks, while others can pick and pack orders. The configurable Radio Frequency menu functionality ensures that each user is provided with the appropriate interface.

The logo for PRONTO xi, featuring the word "PRONTO" in a bold, dark blue, sans-serif font, followed by "xi" in a smaller, italicized, dark blue, sans-serif font. The background of the slide is a light gray with large, overlapping white and orange geometric shapes. A faded background image shows a man in a warehouse setting, wearing a dark jacket and holding a tablet. Overlaid on this image are several vertical orange bars of varying heights and a large orange square in the top right corner.
