Scanpack

## Scanpack is the smart solution for the efficient picking, packing and dispatch of goods

Streamline warehouse processes, increase the accuracy of stock movements and enhance "track and trace" visibility with Scanpack. It allows you to scan, track and manage large numbers of items, cartons and pallets using barcode technology, including the automated printing of barcode packing and Serial Shipping Container Code (SSCC) labels. Scanpack enables you to capture carton and pallet content information, reducing errors and increasing order fulfilment accuracy.

Scanpack typically manages orders using the following process:

- Electronic Data Interchange (EDI) purchase orders containing the required quantity and price of each item are received from customers

- purchase orders convert into sales orders within Pronto Xi, and sales orders are generated by store or distribution centre

- the required quantity of each item is packed and validated

- once a sales order is complete or when the carton is full, the carton size code is entered into Scanpack and a serialised label is printed

- the carrier, consignment details, dispatch date/time, expected arrival date/time and transport reference are all recorded in Scanpack

- total order weight and volume are calculated, but this can be overridden if needed

- dispatch documentation is created in Scanpack and a shipment invoice is printed

- SSCC details are sent back to the customer in an EDI advanced shipping notice (ASN)

Scanpack supports industry standards and integrates with Pronto Xi's Inventory, Warehouse Management System and Financials modules.

Package dimensions to be captured at dispatch using WMS RF Scan pack module

About us

PRONTO
SOFTWARE

We are an Australian developer of award winning business management and analytics solutions. Pronto Xi, our Enterprise Resource Planning (ERP) software, integrates accounting, operational and mobile features in a single system – optimising business processes and unlocking actionable insights. That's why for more than 45 years, over 1,500 Australian and global organisations, across a wide range of industries, have trusted Pronto Xi to simplify their most complex challenges.

With headquarters and our Development Centre located in Melbourne, we have support offices and consultants based across Australia, as well as a global network of Resellers and Solution Partners. Specialised business units within Pronto Software have the expertise to assist you with pivotal technology – Digital Transformation with Pronto Woven, Cloud and Hosting services with Pronto Cloud and Business Intelligence solutions with Pronto iQ.

When you choose Pronto Software, you gain a team with deep industry experience, giving us the ability to understand your specific needs and build innovative solutions that drive business growth and revenue.
